South Jakarta, Jakarta, Indonesia

Summary

IT Enginer ↗ Design Enginer ↙ Open Collective Dev

zamkara's a five-year blend of design and engineering, forged inside open-source workflows and battle-tested in the Open Collective ecosystem. I build UI/UX and design systems that move fast, stay clean, and don't collapse under real use. Fluent in Unix* like, fluent in flow mixing design instinct with engineering logic to keep things minimal, coherent, and actually usable. I design for people, build in the open, and keep iterating until the system shuts up and works.

5th+

Education Level

Amikom Purwokerto University
Bachelor of Computer Science, Informatics

2021 - 2025
GPA 3.73/4.00

Experiences

Lezza.id Rama Putra Jaya
Senior Creative Designer

2026 - Current
Frozeen Processed food

- Joined as part of the founding creative team to rebuild Lezza's entire visual foundation from the ground up spanning brand expression, printed materials, promotional assets, and structural systems across all supporting media.
- Executed end-to-end creative output across OOH billboard placements, transit advertising, social media content, food photography, and video campaign production aligned to the "Enakin Mulut Lo!" brand direction.
- Translated brand DNA (Brave, Honest, Cool) into a cohesive and commercially scalable visual system deployed across digital, and live commerce s touchpoints.

Auctus Commerce™
Creative Designer

2025 _ Current
Business enabler Digital Agency

- Delivered creative assets across e-commerce and live commerce for national brands including Taro, Wipol, MS Cosmetic, Sadewi, and MSKIDS — driving up to 15% engagement rate, 29K peak viewers, and 4m51s average watch duration.
- Spearheaded visual overhaul of Auctus' main website and service architecture, strengthening brand direction across key e-commerce touchpoints for 450+ live sessions and 120+ brand partners.
- Engineered Stampify, an internal automation tool that eliminated manual catalogue workflows → resolving 75+ store tasks and cleaning 1,000+ data entries daily across TikTok and Shopee exports.

Ideas Measure™
Creative Designer

2024 - 2025
Creative & Performance Digital Agency

- Produced performance-driven digital assets, boosting engagement by 45% in three months and delivering creatives for 20+ national and international brands, with a 3.2% average CTR uplift.
- Collaborated across teams and partner agencies on integrated 360° campaigns exceeding IDR 1B in spend, ensuring visual consistency and measurable impact through cohesive creative execution.

Rumah Photo Studio
Creative Designer

2020 - 2024
Creative Modern Photo Studio

- Crafted promotional visuals for wedding and advertising projects, with precise photographic editing and developed cohesive publication layouts to enhance brand perception and visual integrity.
- Managed the full creative workflow from concept to production, ensuring clarity and quality across all outputs.

HorizonDroid
Maintainer & UI Developer

2024 - Current
Global Android Distro Community

- Developed and maintained the Horizon Droid interface, ensuring performance, usability, and aesthetic consistency, while implementing UI components and system themes aligned with project guidelines.
- Contributed to open-source collaboration, issue tracking, feature enhancement, and optimized UX flow and interface responsiveness for seamless Android integration.

KomodoOS Indonesia
Maintainer & UI Developer

2022 - Current
Global Android Distro Community

- Designed and maintained UI components for a Lineage-based Android system, focusing on consistency, performance, and developing visual assets and system themes that align with modern design standards.
- Collaborated with the open-source community to enhance system stability, optimize interface usability, and ensure cohesive branding across platforms for improved user experience.

Intermedia Amikom Purwokerto
Designer

2023 - 2024
IT Enthusiast Organization

Produced visuals and publications for 30+ events, driving 300+ participants, handled weekly documentation and digital dissemination, and collaborated with a 4-member creative team to maintain consistent narrative and design flow.

Projects

Independent Tera Shortlink
Dev Founder

2025
Minimalist & Powerfull Shortlink

- Minimalist, privacy-centric URL shortener on Cloudflare Workers + KV.
- Supported custom/auto slugs, expiry, metadata, per-user isolation.
- Provided lightweight analytics and secure, stateless architecture.

Open Project

FOSS Capybara Captcha
Dev Founder

2025
PoW-based & Serverless CAPTCHA

- Architected CAPTCHA using proof-of-work logic on Cloudflare Workers for zero-server, privacy-first deployment, designing minimal and efficient API endpoints (/challenge, /verify, /get) with stateless functionality.
- Utilized KV store for ephemeral state, ensuring no cookies, no tracking, and data discarded after use, while optimizing response latency (~50 ms), payload size (~5 KB), and achieving high throughput on the free tier.

Open Project

Dropit
Dev Founder

2025
LAN-only P2P File & Chat

- Built a Next.js app for LAN-only P2P file sharing and chat via WebRTC, using Cloudflare Durable Objects for signaling and fallback to KV and in-memory for development.
- Enabled optional AES-GCM encryption for sender-side security, designed stateless direct LAN traffic with no STUN/TURN, and relied on host candidates only.

Open Project

Almatera
Portfolio site

2024
Personal Portfolio Website

- Built a responsive, minimalist portfolio website with AstroJS, showcasing graphic design and frontend work, and integrated dynamic content management, blog, and project showcases.
- Deployed with a modern web stack, emphasizing privacy, speed, and maintainability.

Open Site

ELLS Amikom Purwokerto
Product Designer

2024
Gamified E-learning System

- Utilized MDA framework to Integrated gamified features: Learning progression system, social motivation elements, achievement recognition.
- Implemented Lean UX: MVP, rapid prototyping, feedback loops.
  Conducted usability testing: Cognitive walkthroughs (100% success on 7/8 tasks), UEQ.

Open Project

Course Taken

Linux System Administration, Open Source Development, Network Security, IT Maintenance, and Programming.

Achievement

1th Winner of Live Cyber Security winner by Technology Innovation Competition 2024

Volunteer Experiences

Baturraden Trailrun Platform
Product Design Developer

2024
Sport Platform Website

- Crafted intuitive interface for event registration platform, ensuring fluid navigation and immersive flow.
- Aligned design execution with brand vision and thematic direction through close coordination with event and marketing teams.

DevSecOps Eraspace 2024
IT Company Event

2022
Event Designer

Developed a cohesive visual identity and campaign logo for digital and merchandise media, creating high-impact promotional assets to reinforce event presence and marketing reach.

Komitkabe IT Gathering
Designer

2024 - 2025
IT Enthusiast Event

Designed a unified visual identity across banners, posters, and merchandise, elevating event engagement, and directed the end-to-end creative process from concept to delivery with consistent precision and quality.
